📍 Residence Jean Gremillon, building C, room 11

## 🚀 SOFTWARE SKILLS

Deep learning, tensorflow

Computer vision, opencv

Machine learning, sklearn

Python C, C++ Java

HTML CSS Javascript

## ❤️ INTERESTS

Body building

Basketball

Reading articles about artificial intelligence in medium

## 🗣️ LANGUAGE SKILLS

English (toeic test : 805 points)

French (fluent)

Arabic (mother tongue)

## 🏠 PROFILE

A second year engineer student interested in fields of machine and deep learning and looking for an internship at the first of may

## 🎓 EDUCATION

**Ensicaen, public engineering school** 2020-2023

Engineer student in computer science, major artificial intelligence, image and sound

**The high school Mohamed 5, Maroc** 2017-2019

Preparatory classes, mathematics and physics

**The high school El khawarizmi, Maroc** 2017

Baccalaureate in Mathematical Sciences

First class honours

## 💼 EXPERIENCE

**Restaurant Napolitain and restaurant Bolywood** 2019-2020 - Present

Waiter

- Order management

- Collections

## 💡 PROJECTS

**Real time face mask recognition**

Create a deep learning model that predicts in real time if a human is wearing a mask or not using python and opencv.

**Programmation of a formula 1 car**

Create and develop an algorithm that let the car choose the right path in the C language.

**Heart disease detection**

Create a machine learning model that predicts within someone has a heart disease or not using python.

## ✅ ACHIEVEMENT

IBM professional certification in machine learning. (2021)
